

Custom Cable Assembly Manufacturing

CAPABILITY STATEMENT

ABOUT US

- JB Manufacturing has been designing and building custom cable assemblies and wire harnesses since 1988. Using your engineered drawings or samples we can also help in the engineering or upgrading of your cable assembly needs with expert suggestions of equivalent parts that JB MFG is already approved through factory and using there tools and factory direct special pricing.
- JB Manufacturing designs and builds custom cable assemblies and wire harnesses using genuine Pandit, Molex and Carpenter equipment and parts. But not limited to those specific manufacturers.
- JB Manufacturing has automated and semi automated tooling along with dozens of hand tools that can be made into semi automated with our pneumatic assisted hand tool cylinders. This meets customer applications.
- JB Manufacturing has the capability to solder and tin wires for applications like D-sub connectors, and other components that require custom configuration to your assemblies.
- JB Manufacturing is able to work with engineering and quality control to assure your cables and wire harnesses meet UL certified standards and production operations.
- We are a Family Owned and operated small business.

Family owned and operated since 1988

Our manufacturing facility is located in the beautiful North Idaho panhandle. From here we manufacture products for clients throughout the United States and around the world.

INDUSTRIES

- FAA Surge Protectors
- FAA Multi-Conductor Cables
- Marine Industry
- Commercial Equipment
- Automotive
- Security Systems
- Lighted Signal Towers
- OEM

Visit our website for more examples

Types of ASSEMBLIES & WIRE HARNESSSES

- Custom Wire Harnesses
- Multi conductor cables
- Braided ground straps
- LED assemblies
- Flat Ribbon Cables
- Phone cords
- Power cords
- Wire processing

TOOLING

- Carpenter wire processing machine
- Panduit terminal Automated tooling
- Panduit Semi-Automated tooling
- Molex TM-42 pin type terminating automated tool
- Molex Semi-automated tooling
- Pneumatic hand tool applicator for semi-automated production
- Large wire crimping hand tools

Pneumatic assisted hand tool cylinders insure consistent precise crimps.

Our Carpenter automatic stripping machine can process up to 4,900 pieces an hour. Carpenter is the industry leader of fast and accurate equipment.
